CONSTRUCTION SERVICES

BY SHREYA CONSTRUCTION SERVICES

SPECIALISED IN DIGITAL PROCESS CONSULTANCY
AND RETROFITTING JOBS

ABOUT US

In 2022, Nitin Shahane, a chemical engineer from Mumbai University, founded Shreya Construction Services with the goal of providing quality and cost-effective services to the construction industry. 19+ prior experience in the construction field, technical know how and customer centricity, Nitin was determined to make Shreya Construction Services (SCS) the leading construction services company in India.

Nitin began by creating a unique business model that emphasized customer satisfaction. He associated with Construction digital quality process provider digiQC, retrofitting technocrats B-BAMS and worlds leading anchors and tools providers Rawlplug, with the team of highly qualified professionals from various disciplines who were passionate about their work.

Till now, Shreya Construction Services had become one of the most sought-after companies in construction projects. Our hard work and dedication had paid off and we are now firmly established as an industry leader.

WHAT DO WE DO?

1. Digital quality control process consultant
2. Chemical and mechanical anchor design, supply and installation
3. Diamond demolition
4. Structural steel work
5. Structural audit
6. Structural retrofitting
7. Construction MEP support system

OUR SERVICES

Top leading services we provide

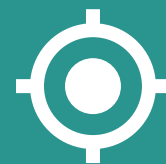

Digital quality control is the most important thing today construction industry needs to save rework, intime project completion, remote approvals and increasing overall productivity. Paperless green technology, all project data on fingertips of management

Structural Audit and MEP audit is most important part of old buildings and increasing life of of the structures. One needs to be master in know how of structural aspects construction. B-BAMS team alongwith SCS look forward to create strong, reliable and long lasting structures in India

We provide anchor fastener design to save cost from undesired brands costing 2X-3X based on some influence. This saves end customers huge costing and can invest in better project resources to speed up project. eg. Post installed bars, Insert plate anchors, facade anchors, MEP anchors & support system
